No. 7600049

THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

Seed Research Associates, Inc.

Whereas, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF seventeen YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT. THE UNITED STATES SEED OF THIS VARIETY (1) SHALL BE SOLD BY VARIETY NAME ONLY AS A CLASS OF CERTIFIED SEED AND (2) SHALL CONFORM TO THE NUMBER OF GENERATIONS PRESCRIBED BY THE OWNER OF THE RIGHTS. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

WHEAT

'5221'

In Testimony Whereof, I have hereunto set my hand and caused the seal of the Plant Variety Protection Office to be affixed at the City of Washington this 28th day of September in the year of our Lord one thousand nine hundred and seventy-seven

Attest:

Commissioner
Plant Variety Protection Office
Grain Division
Agricultural Marketing Service

Secretary of Agriculture

OMB NO. 40-R3712

APPLICATION FOR PLANT VARIETY PROTECTION CERTIFICATE

INSTRUCTIONS: *See Reverse.*

1. VARIETY NAME OR TEMPORARY DESIGNATION	2. KIND NAME	FOR OFFICIAL USE ONLY	
5221	Hard red winter wheat	PV NUMBER 7600049	
3. GENUS AND SPECIES NAME	4. FAMILY NAME *(Botanical)*	FILING DATE 3/4/76	TIME 10:30 A.M.
Triticum aestivum	Graminaeae	FEE RECEIVED $ 250.00 $ 250.00 $ 250.00	BALANCE DUE $ 3-4-76 $ 12-9-76 $ 9-27-77
	5. DATE OF DETERMINATION 1972		

6. NAME OF APPLICANT(S)	7. ADDRESS *(Street and No. or R.F.D. No., City, State, and ZIP Code)*	8. TELEPHONE AREA CODE AND NUMBER
Seed Research Associates Inc.	Route 2, Box 48 Scott City, Kansas, 67871	

9. IF THE NAMED APPLICANT IS NOT A PERSON, FORM OF ORGANIZATION: *(Corporation, partnership, association, etc.)*	10. STATE OF INCORPORATION	11. DATE OF INCORPORATION
Corporation	Kansas	June, 1973

12. Name and mailing address of applicant representative(s), if any, to serve in this application and receive all papers:

Kenneth L. Goertzen, President
Seed Research Associates Inc.
Route 2, Box 48
Scott City, Kansas, 67871

13. CHECK BOX BELOW FOR EACH ATTACHMENT SUBMITTED:

- [X] 13A. Exhibit A, Origin and Breeding History of the Variety *(See Section 52 of the Plant Variety Protection Act.)*
- [X] 13B. Exhibit B, Botanical Description of the Variety
- [X] 13C. Exhibit C, Objective Description of the Variety
- [X] 13D. Exhibit D, Data Indicative of Novelty
- [X] 13E. Exhibit E, Statement of the Basis of Applicant's Ownership

14A. Does the applicant(s) specify that seed of this variety be sold by variety name only as a class of certified seed? *(See Section 83(a). (If "Yes," answer 14B and 14C below.)* [X] YES [ ] NO

14B. Does the applicant(s) specify that this variety be limited as to number of generations? [X] YES [ ] NO

14C. If "Yes," to 14B, how many generations of production beyond breeder seed? [X] FOUNDATION [X] REGISTERED B 3/25/80 [X] CERTIFIED

The applicant declares that a viable sample of basic seed of this variety will be deposited upon request before issuance of a certificate and will be replenished periodically in accordance with such regulations as may be applicable.

The undersigned applicant(s) of this sexually-reproduced novel plant variety believes that the variety is distinct, uniform, and stable as required in Section 41 and is entitled to protection under the provisions of Section 42 of the Plant Variety Protection Act.

Applicant is informed that false representation herein can jeopardize protection and result in penalties.

EXHIBIT 13A: ORIGIN AND BREEDING HISTORY OF 5221

Sturdy X SRAI (parentage unknown)

Original seed stock of 5221 was obtained by bulking a single plant selection made in the F_4 generation.

From this preliminary increase sufficient seed was obtained to start test and evaluation.

Uniformity is equal to Scout when grown under the same conditions.

5221 has no known variants

Different generations produce plants that have the same appearance and performance.

Seed classes to be produced beyond breeders seed are foundation and certified seed. Only certified seed will be offered to the public.

Foundation and certified seed will be grown according to Kansas Crop Improvement requirements.

00002

Exhibit 13A: Origin and Breeding History of 5221

Sturdy X SRAI 2370 (parentage unknown)

Original seed stock of 5221 was obtained by bulking a single plant selection made in the F_4 generation.

From this preliminary increase sufficient seed was obtained to start test and evaluation.

Uniformity is equal to Scout when grown under the same conditions.

5221 is very stable for such practical agronomic characteristics as heading date, maturity, height, and rust reaction.

Seed classes to be produced beyond breeders seed are foundation and certified seed. Only certified seed will be offered to the public.

Foundation and certified seed will be grown according to Kansas Crop Improvement requirements.

No particular requirements are necessary in order to maintain the purity of 5221 besides using a clean drill for seeding, roguing out any variants, and a clean combine for harvesting.

Roguing is used to remove variants. Offtypes whether taller, shorter, later, or of differing glume color should represent either mechanical mixtures or natural hybrids. Off types different from those mentioned should not be present in a commercial field planted to certified seed of 5221.

INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and $250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

5 Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.

13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.

13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.

13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.

13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.

13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

 Botanical Description of 5221

The seed is hard and red with a narrow and deep crease. The brush varies from short to long but with a predominance of short brushes. The seed shape varies from oval to elliptical but oval seeds predominate.

The juvenile growth is prostrate with green color.

The stem is hollow and it has 3 nodes above the ground.

The glumes are long and wide and glabrous. The shoulder is square with an acuminate beak

The flag leaf at dough stage is usually held horizontal with twist to left.

This wheat has good straw strenth,is semi dwarf in height, and bearded

13B Objective Description of 5221

5221 is superior to Eagle in Hessian Fly resistance
It is susceptible to soil borne mosaic
Shows resistance to leaf rust
It has good lodging resistance
Headed 1 day ahead of Eagle (KIN 1975)
Height 4.3 " shorter than Eagle (KIN 1975)
Straw chaff
Bearded
Hard red winter
Excellent functional properties of the protein

INSTRUCTIONS

GENERAL: The following publications may be used as a reference aid for the standardization of terms and procedures for completing this form:

(a) L.W. Briggle and L. P. Reitz, 1963, Classification of Triticum Species and Wheat Varieties Grown in the United States, Technical Bulletin 1278, United States Department of Agriculture.

(b) W.E. Walls, 1965, A Standardized Phenol Method for Testing Wheat Seeds for Varietal Purity, contribution No. 28 to the handbook of seed testing prepared by the Association of Official Seed Analysts. *(See attachment.)*

LEAF COLOR: Nickerson's or any recognized color fan should be used to determine the leaf color of the described variety.

00007

CHEMICAL, MILLING, AND BAKING DATA FOR THE KANSAS INTRASTATE NURSERY COMPOSITES OF HARD WINTER WHEAT VARIETIES HARVESTED IN 1975

Chemical, milling, and baking data for the Kansas Intrastate Nursery composites of hard winter wheat progenies harvested in 1975 are given in Table 1. Mixograms of 10-g. flour samples are reproduced in Figures 1 and 2.

A composite sample of each entry was made up of 500 g. from each of five stations in the eastern half and five stations in the western half of Kansas. Stations in the eastern half included Newton, Hutchinson, Manhattan, Powhattan, and Belleville. Those in the western half included Minneola, Garden City, Tribune, Hays, and Colby.

When producing a continuous phase of protein during mixing, protein content becomes increasingly limiting as it decreases below about 12%, so that mixing time increases as protein content decreases below about 12%. Thus, when flour protein content is below 12%, mixing time in Table 1 has been decreased about 12% for each 1% of protein below 12% before comparing mixing times of varieties.

Most of the CIMMYT/Scout selections have good overall quality characteristics. A few have been noted because of preferred protein content, mixing time, or loaf volume potential. Thus, KS73146, KS73148, 73199, and KS73261 are labeled as promising; KS73159 is particularly promising because of good mixing properties and outstanding loaf volume potential. Mixing time of KS73253 may be somewhat shorter than is desirable.

Overall quality characteristics of C 4, Dual VIII, Dual I, and KS73H441 also are promising. F_1 hybrids 7302 and 7303 are particularly promising because of high wheat and flour protein contents.

Referring to the three CIMMYT/Scout samples from Hays, KS73H530 is promising and distinctly the best of the three selections. Mixing times of the other two are undesirably short. Also, the wheat protein content of KS73H530 is somewhat higher than that of Lancota.

1/ Chemical data expressed on a 14% moisture basis.

2/ S, Q, and U - Satisfactory, questionable, and unsatisfactory quality with respect to properties in question. A satisfactory rating is inferred in the absence of a designated one. One unsatisfactory rating, in general, characterized a variety as undesirable for hard wheat milling and breadmaking purposes. Crumb colors were satisfactory for all entries.

3/ Mixing time used in baking is evaluated in conjunction with other mixing properties obtained from the 10-g. mixogram.

4/ Softer than average hard wheat milling properties but entirely satisfactory.

5/ Promising overall quality characteristics.

6/ Particularly promising overall quality characteristics.
